ROLL-UP DOORS, INC.

lawrencedoors.com

Since 1925, **Lawrence Roll-Up Doors, Inc.** has been manufacturing steel and aluminum rolling door products in Los Angeles, California. We offer various duty-cycle rated doors and grilles suited to meet the needs and budgets of each building owner or tenant. Our "Heavy Duty" products are suitable for the most demanding conditions of heavy industrial settings, maximum-security environments, and high-frequency usage. Lawrence "Medium Duty" doors are our most popular products, value engineered for normal commercial applications. Our "Standard Duty" doors and grilles combine quality design and lighter weight construction to offer an economical product for the most cost conscious buyer. More than 75 years of product design and manufacturing experience enable us to provide custom products to comply with special design and unique installation requirements.

SERVICE DOORS

- ▶ **HEAVY DUTY SERVICE DOORS** (Model HD) are designed for up to 50,000 cycles usage, are standard with a 22, 20 or 18 gauge galvanized steel curved or flat slat curtain, and include a rugged double steel angle bottom bar and heavy steel guides. They are available with a large variety of options and can be made in almost any size.
- ▶ **MEDIUM DUTY SERVICE DOORS** (Model MD) include a 20,000 cycles spring design, can be provided with a 24, 22 or 20 gauge galvanized steel curved or flat slat curtain, heavy extruded aluminum or double steel angle bottom bar, and steel guides. MD service doors are available with most of the same features and options as HD service doors, and are suitable for openings to 20' wide and 16' high.
- ▶ **STANDARD DUTY SERVICE DOORS** (Model SD) are designed for 10,000 cycles usage, utilize an efficient 24 gauge galvanized steel semi-curved slat curtain, include an extruded aluminum bottom bar and lighter weight steel guides, and can be provided with many options. SD service doors are limited in size to 16' wide and 16' high.

Note: Heavy Duty and Medium Duty service doors are available as **Weather-Edge Doors** (Models HW & MW) with full perimeter weather seals, and as **Insulated Doors** (Models HI & MI) for maximum climate control. Heavy Duty service doors can also be provided as **Ventilated Doors** (Model HV) with perforated slat curtains for the ultimate combination of ventilation, visibility, and security. Many service door products can be provided with stainless steel or aluminum slats, bottom bar, guides and hood.

COUNTER SERVICE DOORS

- ▶ **COUNTER SERVICE DOORS** (Model CD) provide many of the same features and benefits of normal service doors but with a more compact design suitable for use on smaller openings. They include a smaller profile 22 gauge galvanized steel flat slat curtain, single angle or tubular shape bottom bar, and smaller guides, resulting in an attractive product requiring less clearance. CD counter service doors are limited in size to 20' wide, 10' high, 120 sq. ft.

Note: Counter service doors are also available with stainless steel or aluminum slats, bottom bar, guides and hood.

FIRE DOORS & COUNTER FIRE DOORS

- ▶ **HEAVY DUTY FIRE DOORS** (Model HL) combine many HD service door design features with simplified automatic closing and re-set functions to provide state-of-the-art fire protection for openings to 44' wide, 40' high, 1320 sq. ft.
- ▶ **STANDARD DUTY FIRE DOORS** (Model SL) offer the same closing and re-set systems of HL fire doors, but with a lighter weight door design intended for fire protection of smaller openings and less frequent usage. SL fire doors are suitable for openings to 14' wide and 14' high.
- ▶ **COUNTER FIRE DOORS** (Model CL) provide the same high levels of fire protection and many of the same features as normal fire doors, but in a compact door design for smaller openings. CL counter fire doors are limited in size to 16' wide, 10' high, 120 sq. ft.
- ▶ **CLOSING SYSTEMS** All chain, crank and motor operated fire doors close automatically without a loss of spring tension and eliminate the need for traditional mechanical re-set. A variety of closing system options are available to upgrade standard fusible link activated automatic closing to fail safe time-delayed release and motor-controlled closing systems with audible, visual and voice warnings.

Note: Lawrence fire doors & counter fire doors are classified by Underwriters Laboratories (UL), certified for Canada (c-UL), and listed by the California State Fire Marshal (CSFM). They are approved for installation in masonry or non-masonry walls rated up to 3 hours. Models HL, SL and CL are available with a UL S-Label as air leakage rated **Smoke Doors**. Most fire and counter fire doors can be provided with stainless steel slats, bottom bar, guides and hood.

GRILLES

- ▶ **HEAVY DUTY GRILLES** (Model HG) are designed for up to 50,000 cycles usage with a durable aluminum straight link pattern curtain, and heavy extruded aluminum bottom bar and guides. A self-leveling bottom bar (up to 1/2") and field adjustable curtain stop and lock bar heights are standard features. HG grilles are ideal for larger size openings and higher usage applications.
- ▶ **STANDARD DUTY GRILLES** (Model SG) are intended for lower usage applications typical for storefronts and shopping malls. These grilles offer the same features as HG grilles, but with a lighter weight curtain construction. SG grilles are suitable for openings to 30' wide, 14' high, 300 sq. ft.
